

As you can see,
not much happens
on our lovingly
protected land.

We make sure that Highland Spring's Perthshire hills aren't touched by pesticides, farming, habitation, smog, buildings, agricultural spraying or pollution. Just rain. Perhaps that's why we were the first UK bottled water to have our land certified organic, which makes us the perfect partner for the Soil Association Organic Food Awards 2009.

The Soil Association is a membership charity promoting climate-friendly organic food and farming.
